

Adamyia Pandey

Computer Science Undergraduate (AI & ML) · Machine Learning & Systems Design

New Delhi, India · +91 98705 45045 · adamyia.pandey2506@gmail.com · linkedin.com/in/adaammya16 · github.com/Adammyia

SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence & Machine Learning, with a strong interest in model design, AI research, and the systems that support them. Built backend services and infrastructure — REST APIs, authentication systems, and database-backed applications — during a software development internship, developing a practical foundation in system design, debugging, and engineering rigor. Drawn to research-oriented and systems-building work in machine learning, including large language models and emerging AI architectures, and seeking opportunities to contribute to ML research, model development, or applied AI systems.

TECHNICAL SKILLS

Languages	Python, Java, JavaScript (ES6+), C, C#, SQL
Frameworks & Libraries	React.js, Node.js, Express.js
Databases	MongoDB, MySQL
Web & APIs	REST API Design, JWT Authentication, HTML5, CSS3
Tools & Platforms	Git, GitHub, Postman, Unity Engine, VS Code
Areas of Focus	Machine Learning & AI Systems, Systems Design, Backend Architecture

PROFESSIONAL EXPERIENCE

Backend Development Intern — Atthah Info Media Pvt. Ltd.

JUN 2025 – AUG 2025

Gurugram, Haryana

- Built a cryptocurrency-tracking web application using React and Node.js, integrating public REST APIs to display real-time market data with filtering and sorting functionality.
- Implemented JWT-based authentication for backend services, managing token issuance, validation, and protected route access.
- Developed and debugged server-side logic in Node.js/Express within a collaborative, version-controlled (Git/GitHub) team workflow.
- Designed a physics-based 2D Pong game in Unity (C#), implementing collision detection and a scoring system as part of a self-directed game development track.

PROJECTS

Blog Platform with Authentication

Node.js · Express · MongoDB · JWT · bcrypt

- Built a backend system with JWT-based authentication, bcrypt password hashing, and role-based access control.
- Designed secure REST APIs for CRUD operations on blog content, using MongoDB for data persistence.

AI Assistant Interface (Jarvis-Inspired Desktop Assistant)

React · Vite · Node.js · REST APIs

- Developed a desktop assistant interface integrating system monitoring, live weather, and news-feed APIs into a unified dashboard.
- Implemented voice-interaction features to enable hands-free control of assistant functions.

Cryptocurrency Tracker

React · Node.js · REST APIs · CSS

- Built a React application that fetches real-time cryptocurrency data from public APIs, with currency filtering and sorting.

Personal Portfolio Website

HTML · CSS · JavaScript

- Designed and deployed a responsive personal portfolio site to showcase technical skills and project work.

EDUCATION

B.Tech in Computer Science & Engineering (Artificial Intelligence & Machine Learning)

EXPECTED 2028

KCC Institute of Technology & Management, Greater Noida (Affiliated to AKTU)

Relevant Coursework — Data Structures & Algorithms, Database Management Systems, Machine Learning
